SPAWAR ACQUISITION PROCEDURES

(1) SPAWAR Contract Policy and Procedures Manual (SCPPM)

1. Purpose. To provide a web-based manual in which contracting guidance is made available to the Claimancy.
2. Cancellation. This instruction supercedes and cancels SPAWARINST 4200.26A.
3. Background. The SCPPM supports the SPAWAR vision of becoming the premier provider of C4ISR, IT, and Space capabilities. As an integral part of the SPAWAR Corporate Contracting Strategy, the SCPPM is a tool to help ensure that the strategic goal to streamline and consolidate the acquisition process is fulfilled by producing contractual guidance that assists in giving our acquisition workforce decision-making information at their fingertips.
4. Information. This web-based manual will reside on the SPAWAR Knowledge Center on the Contracts Policy VPO site. It will eventually migrate to the SPAWAR Contracting Directorate Intranet site.
5. Action. SPAWAR HQ and Claimancy Contracting Offices will use this instruction as authoritative guidance on all matters covered within it effective immediately. SPAWAR Director/Executive Director for Contracts are authorized to issue changes/revisions to the SCPPM as deemed necessary.
